PROFESSIONAL SUMMARY

Information Systems graduate from Universitas Nurdin Hamzah with a 4.00/4.00 GPA, focused on building data-driven applications that combine Data Analytics, Business Intelligence, Generative AI, APIs, and automation. Experienced in developing web-based analytics dashboards, AI-assisted applications, and structured database-driven systems using Python, SQL, Streamlit, and modern AI APIs. Built and completed projects including VORIX, an AI-powered crypto market intelligence and autonomous trading application, and an English Self-Assessment Platform with question management, analytics, role-based administration, and automated testing. Strong problem-solving mindset with an interest in building practical technology products and intelligent applications.

EDUCATION

Universitas Nurdin Hamzah – Jambi , Indonesia | 2022 – 2026
Bachelor of Computer / Sistem Informasi | **GPA: 4.00/4.00**

Thesis: Implementation of an Integrated Analytics Dashboard with an AI Assistant for Service and Operational Performance Evaluation using Streamlit.

SELECTED PROJECTS

VORIX — AI-Powered Crypto Market Intelligence & Autonomous Trading
AI / Web3 / Automation | Python, Gemini API, Market Data APIs, BNB Chain, DEX integration

- Developed an AI-powered application for automated crypto market screening, combining technical indicators including RSI and Fibonacci-based criteria to identify potential market opportunities.
- Integrated a Gemini-powered AI agent to interpret market conditions and control application workflows for trading actions, including buy, take-profit, and cut-loss execution.
- Designed a market-data and execution workflow integrating external APIs, portfolio monitoring, risk/position logic, and on-chain trading components.

English Self – Assessment Platform
Education Technology | Python, Streamlit, SQLite, DOCX/Excel processing, Automated Testing

- Developed a web-based English self-assessment platform for Grammar, Reading Comprehension, and Listening Comprehension practice.
- Implemented question-bank management, randomized question selection, scoring, learning history, performance analytics, and role-based administrative features.
- Implemented data validation, password hashing, automated backup, DOCX/Excel import-export workflows, and automated testing to improve reliability and maintainability.

Integrated Analytics Dashboard with AI Assistant
Data Analytics / BI / AI | Python, Streamlit, SQL, Pandas, Generative AI

- Developed a real-time web-based analytics dashboard connected to a SQL database for monitoring business and operational performance.
- Built analytical modules covering executive overview, target vs. realization, service and product analysis, operational/patient analysis, and an AI Data Consultant.
- Applied data processing, KPI analysis, visualization, and natural-language interaction to transform structured data into actionable insights.

EXPERIENCE

Asisten Laboratorium Komputer — Universitas Nurdin Hamzah | July 2024–Aug 2026

- Supported students during computer laboratory sessions and assisted with technical issues during practical activities.
- Maintained structured documentation and activity records, monitored practical sessions, and contributed to evaluation activities.
- Communicated technical solutions clearly while supporting students with different levels of technical understanding.

Freelance Data Entry Administrator | Aug 2025–May 2026

- Managed and maintained structured transaction records with attention to data accuracy and consistency.
- Performed routine data validation and identified anomalies or inconsistencies between digital records and source documents.
- Maintained organized digital records and handled confidential operational information responsibly.

PROFESSIONAL TRAINING & CERTIFICATIONS

- **RevoU — Data Analyst & Generative AI** | MSIB Batch 7, Jul–Dec 2024
- **KOMDIGI — Associate Data Scientist Professional** | May–Jul 2025
- **Hacktiv8 x IBM — Data Classification & Summarization** | Jul 2025

TECHNICAL SKILLS

- **Programming & Data:** Python, SQL, Pandas, NumPy, Data Cleaning, EDA
- **Analytics & BI:** Power BI, Excel, Google Sheets, Data Visualization, Data Storytelling, KPI Analysis
- **AI & APIs:** Generative AI, LLM APIs, Gemini API, NLP, Prompt Engineering, AI Agents
- **Application & Database:** Streamlit, SQLite, MySQL, SQLAlchemy, REST/API Integration, Git/GitHub
- **Other:** Web Application Development, Automation, Web3/Blockchain Concepts

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

- **Secretary — Himpunan Mahasiswa Sistem Informasi, Universitas Nurdin Hamzah** | 2025–2026
- **Event Chair — Malam Keakraban HIMASIF** | 2025
- **echnical Committee — Public Service Application Training, UNH × DISKOMINFO Muaro Jambi** | Oct 2024

LANGUAGES

Indonesian: Native **| English:** Intermediate
